

Ballast Shoulder Clearance Barrier

A fixed distance (1.25m) rigid safety barrier providing a safe green zone for all line speeds.

Features

Fixed distance (1.25m) rigid safety barrier, providing an effective green zone for all current line speeds up to 140mph.

The barrier arm is shaped to avoid disturbance of the ballast shoulder.

The fixed tip rail clamp is suitable for flat bottom rail only.

With fewer moving parts there is less chance of damage or loss to components.

Lighter, more compact, easier to store and transport than our 1.25m-2m telescopic barrier.

NetworkRail certificate of acceptance: PA05/01952.

PADS number: 094/019031.

Benefits

- Minimal Ballast Disturbance
- Quick to install
- No Ballast to reinstate
- Fixed tip rail clamp
- Fewer Moving Parts
