Development and Validation

Vortok International has introduced a new handheld computer to bring easier use, more modern interfaces and give some future proofing to existing VERSE users. This system is now available as an upgrade kit.

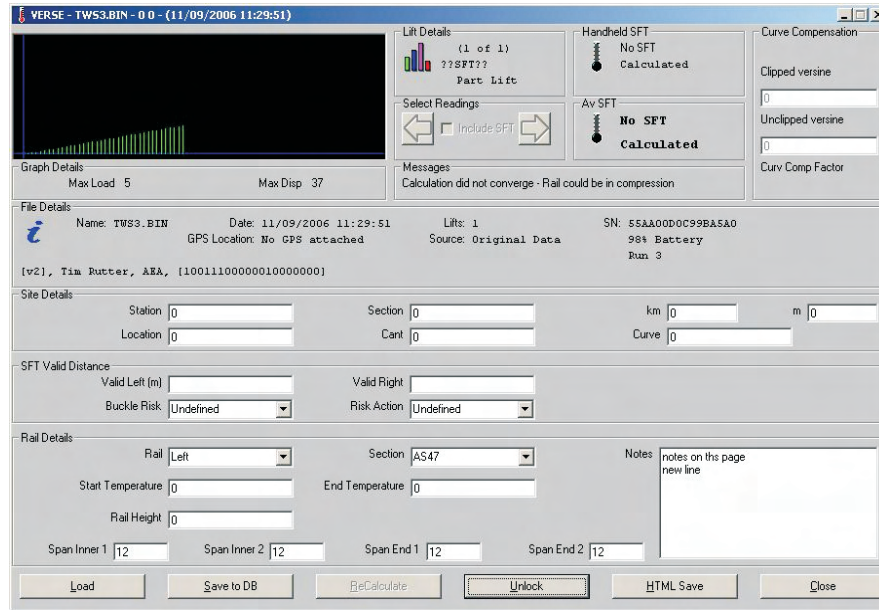

For those existing users of VERSE, the new Radix machine offers several advantages over the now obsolete Husky.

VERSE

Non-Destructive Neutral Temperature Measurement

Charging and data transfer through dedicated cradle which connects to a standard USB computer port.

New PC Software Screen

Enhanced Input Screens

Easier step-by-step inputs; less input errors

Better Graphics

More detailed information on screen

Measurement Monitoring

Watch the load and lift during the measurement

Integrated Curve Compensation

Correction of curve pull in integrated in the whole system

Easier Data Transfer

Cradle connects via USB port and uses ActiveSync™

Ip67 protection

Higher levels of weather protection

Enhanced PC Software

Printing Certificates compatible with StressRoute®
Curve compensation
Site notes
Lengths of measurement validity

Order Requirements: Serial Number of existing Husky and serial number of its partnered digital control box must accompany the order.

Charging can be via mains supply, vehicle 12v cigar lighter sockets or from secondary battery pack.
